Education

UNIVERSITY OF WATERLOO

2016 - 2022

Bachelor of Applied Sciences, Computer Engineering, Graduated with Honours

Work Experience

Arctic Experience

Sept 2024 - Present

Developer 2

Kitchener, Canada

- Acted as team Security Champion, **identifying** and **remediating vulnerabilities** across code and dependencies using tools such as **Snyk**
- Owned and delivered multiple high-visibility public portal projects directly impacting customers
- Served as **SME** for all team-owned public portal applications
- On-call** engineer responsible for **resolving production incidents** and ensuring **service reliability**
- Led **major refactors** of legacy applications to improve **maintainability** and **system stability**
- Contributed to **production readiness** reviews, including **security assessments** and **FOSS license compliance** (ensuring non-copyleft usage)
- Presented** technical projects and architectural decisions to cross-functional stakeholders across the organization
- Contributed to team-wide **AIDLC** initiative adopted across the organization
- Introduced **modern testing** practices (**Playwright component** testing)

Nintex (Inflight and Skuid Acquisitions)

Nov 2022 - Sept 2024

Lead Software Developer

Kitchener, Canada

- Created **responsive** and **accessible** applicant tracking in **Angular** which interfaced with other ones such as **Workday** and **Taleo**
- Implemented** and **maintained** an API which leveraged the **Workday API** to enable the user's application process
- Designed**, completed **POCs** and executed **enhancements** for frontend backend products
- Handled off-hours **production deploys** and ensured system stability
- Interacted with **clients** to solve technical challenges
- Mentored junior team members to help them succeed

Nintex (Inflight and Skuid Acquisitions)

Jan 2021 - Nov 2022

Frontend Developer

Kitchener, Canada

- Created **responsive** and **accessible** Peoplesoft overlay in **Angular**
- Handled extracting data from native system
- Completed POCs and subsequent project
- Used **AWS Cognito**, **Lambda**, **DynamoDB** and **API Gateway** in projects

International Financial Data Services

Sept 2019 - Dec 2019

[Internship] Architecture R&D Full Stack Dev

Toronto, Canada

- Completed POCs using **Angular**, **Spring Boot**, **PostgreSQL**, and **Kubernetes**
- Sketched, built and maintained **backend**, **RESTful APIs** and **web portal**
- Designed the **database structure** and **auditing** keeping track of changes
- Successfully **presented** the finished POCs to various **shareholders**

Personal Project

Fitness Tracking Smart Ring

May 2021 - Apr 2022

- Developed a smart ring device that monitors a user's biometrics, transmits data via Bluetooth Low Energy to a mobile device
- Processed sensor data and transmitted readings over Bluetooth using C
- Led the development of the mobile application using React Native, Redux, and a native Bluetooth module to allow for the wireless retrieval and transmission of data
- Architected and implemented a backend system using AWS services for the purposes of account management and data storage/retrieval
